

DC-890 Fully Automatic Multi-row/Single-row Back-sealing Packaging Machine

The DC-890 fully automatic multi-lane back-seal packaging equipment is suitable for liquid, powder, and granular materials in the food, pharmaceutical, and daily chemical industries. Customizable 6-lane, 8-lane, and 10-lane equipment significantly improves customer production needs.

Our company can customize the equipment based on customer bag size and output requirements. The machine is easy to operate; simply input values into the system to adjust bag length, production time, and store customer product parameters. It is suitable for customers who need high-capacity, high-speed back-seal packaging.

Technical Parameters

Model	DC-890 (Multi-lane customizable based on needs)	DC-890A (Single lane)
Optional Width	11-45mm (Width cannot be changed after selection)
