

MIC 24-6 Beer Can Filling Machine

Mic 24-6 beer can filling machine adopts isobaric pressure filling system which is applicable for beer, carbonated beverage, soft drink, hard cider, soda water, sparkling water and other canned drinks (Cold filling temperature at 0-4 degrees Celsius) If you also want to use the same machine to fill non-carbonated drinks is available. Through change the counter pressure filling valves to normal pressure filling valves then it will be suitable for filling non-carbonated beverages such as energy drink, fruit juice, cold brew coffee, herbal tea and so on.

Machine features:

1. Mic 24-6 beer can filling machine is in the digestion and absorption of advanced foreign and domestic sealing machine on the basis of independent development of the can filling, sealing unit. Filling and seaming part is the overall designed, in order to ensure that both the absolute synchronization and coordination.
2. The machine adopts PLC, frequency converter, human machine interface controlling system, having the advanced controlling technologies, such as frequency control, no can no filling and so on.
3. Isobaric filling system, controlled by pressure, accuracy is $\pm 1\%$, liquid level difference is not more than 2mm. (requires steady pressure and temperature at 0-4degrees Celsius).
4. Can seaming machine is qualified for Chinese seaming standard, and no air leakage at all.
5. It has the characteristics of filling reposefully, high speed, liquid level control, capping reliably, frequency conversion timing, less material loss. It can equip CIP system according to the customers' request. It is the preferred equipment for the small brewery and medium beverage plant

6. Aluminum can and metal can are both available working on our seaming machine, We use our own technical drawing and own processing machine, to make sure our seaming head quality and always easy to purchase.
7. If Cans stock on conveyor then sensor will inform PLC to stop the Can feeding.
8. About machine test and shipment, we are stick with real production test till all problem is fix and then ship out.

Parameters

Power	3.5Kw
Filling heads	24piece
Sealing heads	6piece
Production capacity	4000-8000 CPH based on 330ml
Filling temperature	0-4°C
Filling pressure	Max 5bar/0.5Mpa
Can diameter range	Φ40-90mm
Bottle height	92-168mm
Dimension	2580*1700*1950mm
Weight	3000Kg
