

## HDZ-65F Small Cartoning Machine

The HDZ-65F vertical intermittent cartooning machine is designed for low/medium-production packaging lines and is suitable to handle pharmaceutical, chemical, cosmetic and food products.

## Brief:

The HDZ-65F vertical intermittent cartooning machine is designed for low/medium-production packaging lines and is suitable to handle pharmaceutical, chemical, cosmetic and food products. The HDZ-65F compact design allows easy operator access and makes it suitable for installation in space restricted areas. It has following main functions: Automatic folding (1~4 folding) and conveying of manual leaflet, automatic material categorizing and feeding; automatic paper carton spreading, manual leaflet and material are loaded into carton automatically, synchronous (3-row) batch number printing, automatic paper carton sealing, automatic waster eliminating.

## Features:

- Main machine adopts mechanical drive of cam and crank connecting link, and working of each functional part is in harmony, stable and reliable.
- Single motor driving, Variable frequency speed regulation, PLC+touch screen control system, automatic counting function, operation is simple, running is stable.
- Photoelectric detection and monitoring system to realize overload protection, indication of failure diagnosis, and automatic stop running if there is some trouble.
- Machine has (manual and automatic) two status of running, you can choose any one according to your requirement.
- Under the specified range, can realizes various specifications carton packaging without change any parts.

Machine Model	HDZ-65F
Output 40-80	40-80 Cartons/min
Finished Products Rate	≤99%
Elimination Rate of Waster	100%
Working Noise	≤ 80DdB (A)
Packaging Material	Paper carton size: $(L\times W\times H)$ $(70-125)\times (40-78)\times (15-30)$ mm Material: $250-350$ g/m² Manual leaflet size: $(L\times W)$ before folding: $(100-250)\times (100-150)$ mm $(L\times W)$ after folding: $(100-150)\times (20-40)$ mm Material: $50-70$ g/m²
Air Supply	Clean Compressed Air: 0.5-0.8 Mpa Air Consumption ≥ 0.20m'/min Vacuum Degree: -0.09Mpa
Power Supply	380V±10%, 50/60Hz, 3ph 1Kw (optional).
Machine Size/N.W.	1700 × 1060 × 1600mm 800KG
