

Bottle Capping Machine CDX-450

This machine is suitable for screwing flat head plastic cover caps onto barrels of oil, mineral water bottles, medicine bottles, cosmetic, beverage bottles; special specifications cap, capping head can be customized according to cap diameter and cap height. pharmaceutical, chemical, food, hospitals, scientific research units, laboratory trial-produced and small batch production.

Introduction

- When manufacturing products that are kept in plastic bottles, sealing those bottles can be quite a hassle because the regulations demand that they be screwed tightly. The screw caps ingenious design makes it easy to open and close by hand, but tightening it is an altogether different story. This machine allows the user to screw the bottle caps so tightly that they cannot accidentally open during transport or storage. Also, if a bottle cap is screwed on too tightly, it can help by opening it, as it works in reverse, as well.
- This is a handheld machine, which means that you can work with it anywhere where there is a power supply outlet nearby. Holding it in the hands allows the user to get a better grip and better positioning, so that the work is more precise.

Specifications

Model	CDX-450
Caps diameter	Φ20mm~Φ50mm
Bottles height	80mm~220mm (Customized for height below 80mm)
Power supply	AC220V±10%, 50Hz; 110V, 60Hz
Power	50W
Machine weight	32 kg
Machine size	520*300*530mm
Package size	532*463*615mm
Total weight	38 kg
