

FP-720 Wheat Flour Milk Powder Packing Machine

Description:

1. Control panel: Intelligent control system, more stable operation, and can adjust any parameters without stopping the machine.
2. Standard coding machine: meets the needs of the factory, does not require additional costs, is simple to operate and has stable performance.
3. Center-sealing bag making machine: Reasonable bag making structure, smooth bag making, coordinated film pulling process, and not easy to shift
4. Intelligent horizontal seal: The seal is beautiful and smooth, ensuring that the bag is tightly sealed and no material leaks or spills.
5. Lower feeding film reel: reasonable film feeding structure, automatic unloading and smooth film transport, making it easier to replace packaging auxiliary materials

Technical Parameters

Model	FP-720
Max. Film width	720mm
Bag length	80-400mm
Bag width	80-300mm
Max.packing capacity	5000ml
Packaging speed	5-50 bags/min
Power	4kw, 220V, Single phase
Dimension	1040*1630*1320mm(exclude conveyor)
Machine weight	600kg(exclude conveyor)
