

## Automatic Weigh and Packing Machine HLVN-680

A new, open-frame structure is common to all models, offering exceptional ease of access for operation and maintenance and a stability that renders most fine adjustment unnecessary. Both intermittent and rotary models benefit from new motor and drive technology that improves positional jaw control at the point of sealing.

- We offer a wide range of solutions for filling various types of bags and products.
- The packaging machines for solid products (powder, granules, pellets or flakes), whether foodstuffs or mineral in origin, offer a wide selection.
- All using a compact, sturdy and economical packaging system.
- Offer the perfect balance between function and practicality with the advantage of efficiency.

### Parameters:

Type	HLVN-680
