

DC-820 Pre-made Pouch Packing Machine

The DC-820 disc-type form-fill-seal packaging machine is suitable for fully automatic form-fill-seal packaging of various materials, including liquids, sauces, powders, granules, and solids. It features convenient bag size switching, high packaging speed, and excellent packaging results.

It can achieve filling and sealing of standard stand-up pouches, zipper pouches, and special-shaped pouches. Suitable for customers' large-scale and high-speed production needs.
