

CZG-2 Oil Drum Filling Machine

The filling machine can be applied to filling various oils and viscous liquids. Lubricating oil, antifreeze, chemical raw materials, etc.

Features:

1. The Oil Drum Filling Machine has a wide range of applications, and one machine can complete the filling tasks of various bottle types!
2. Quick changeover, saving time and effort!
3. Efficient and stable, ensuring production efficiency!
4. A number of experimental data, high efficiency and energy saving!
5. The Oil Drum Filling Machine combination of PLC and touch screen, technology, humanity and convenience!
6. Multiple detection technologies to prevent accidents!

Technical Parameters

Model	CZG-2 Oil Drum Filling Machine
Filling capacity	1-25kg 1-50kg(can be adjustment)
Filling speed	180 barrel/hour
Filling accuracy	$\pm\leq 0.1\%$
Power	380V
Filling nozzle	Two heads
Air pressure	0.4-0.7Mpa
Dimension	900*700*1500
Sensor	2 pieces
