

Automatic Online Top Labeling Machine ST212

Technical features:

1. Machine main construction by Stainless Steel #304.
2. PLC combined with touch screen control system.
3. Servo motor driven labeling head, with movable stand, can move the labeling machine to required position freely.
4. Suitable for labeling on the moving product on conveyor
5. Can choose to install the speed detect encoder on customer's conveyor, or input the speed value on touch screen (normally suitable for fix speed conveyor) to assure automatic synchronization on conveyor speed and labeling speed.

Optional:

1. Coding machine
2. Transparent label electric eye

Model	ST-212
Label height / width	A: 10-110mm; C: 10-170mm
Label length	10-250mm
Labeling speed	15-160mm
Labeling speed	12-35m/min
Paper roll inner diameter / outside diameter	Within 76mm/ 360mm
Equipment size	L1450×W700×H1550
