

MIC 4-4-1 Beer Can Filler Machine

Automatic mobile portable beer can filler machine is very suitable for small brewery. It has Co2 purge function, counter pressure filling system, lid loading system, lid seaming system, cover cleaning function.

The beer can filler machine represents a significant technological advancement in brewery operations, offering a streamlined and automated solution for efficiently filling beer into cans. With meticulous engineering and cutting-edge design, this state-of-the-art equipment seamlessly integrates various components to create a highly efficient filling line. By combining speed, precision, and reliability, the beer can filler machine plays a crucial role in meeting the evolving demands of the brewing industry.

Parameters

Equipment Parameter	MIC 4-4-1 Beer Can Rinser Filler Seamer
Production Capacity	1200- 1500pcs/ H(330ml) 396-495L/ H
	1000- 1200pcs/ H(500ml) 500-600L/ H
Voltage	380V-3 Phases-50Hz (Customized)
Power port	3P+ N+G
Power consumption	2.0-3.5KW
Main Material	SUS304
Dimension (L*W*H)	2.00×0.91×1.85M
Equipment Weight	400KG
Packing Size (L*W*H)	2.20×1.15×2.05M
Packing Weight	550KG
