

## *WYGF-2 Capsule Coffee Filling and Sealing Machine*

### **Description:**

1. It can automatically complete cup dropping, metering, feeding, nitrogen filling, coding and sealing, and other functions can be configured according to customer requirements.
2. Wide range of applications, suitable for coffee powder, freeze-dried powder, sugar powder, facial mask powder, fruit powder, tea powder.
3. PLC control screen, adjust the packaging parameters through the touch screen, can store a variety of parameters, improve work efficiency.
4. Cup placing device, empty cups and saucers are placed here, and cups can be placed automatically, saving time and effort.
5. Filling and unloading device, screw-type metering, feeding into the tank, the contact part of the material is made of 304 stainless steel, no cup and no canning.
6. The sealing device adopts constant temperature heat sealing, the sealing is tight, and the temperature can be adjusted independently to apply to various sealing materials.

### **Specification:**

Model	WYGF-2
Machine dimension(L*W*H)	1100*1100*1500mm
Machine weight	450kg
Production capacity	1000 Cups per hour
Motor power	2kw/220v/50HZ
Filling head	2
Sealing head	2
Cup capacity	5~8g
