

2 in 1 Shrink Packaging Machine DFM5540

DFM series 2 IN 1 shrink packaging machine achieves film sealing, cutting, and shrink in one operation and is a very economical packaging machine for small amount productivity; Use POF, PVC, and PP as packaging materials.

It has two functions for option: One is only seal-cut; Another is both seal-cut and shrinking. The hot air is kept in a small heating room, which saves power consumption greatly. In the shrinking process, packing products are wrapped perfectly with strong hot circulating airflow. The shrinking process can be observed through a transparent cover. DFM series machine is widely used in the external packaging of beverage, gift, hardware, cosmetics and plastics, etc.

Features:

1. Complete film sealing, cutting and shrink in one operation
2. Low electricity consumption
3. Automatic electric magnet absorbs cover.
4. Shrinking process can be observed through transparent cover.

Specification:

Model	DFM5540
Power supply	220V / 50-60Hz
Power	4.57KW
Max. sealing size (LxWxH)	550x400x230mm
Max packing product size	L+H≤550mm, W+H≤450mm, H≤230mm
Capacity	150-250pcs/h
Machine size (LxWxH)	1400x730x 1450mm
Machine weight	128kg
