Vertical round bottle labeling machine BCLT100-10

Feeding → separation → clamping → flat labeling → testing and removal → finished product. This equipment is suitable for labeling all kinds of carton, plastic, metal and other flat objects (such as bottle cap, carton flat, plastic flat, metal flat, etc.).

Features:

- Adjustable synchronous clamping mechanism can correct the products to the same angle to ensure the accuracy of labeling.
- Touch human-machine interface, easy to learn. It has multiple sets of memory function. It is easy to change products with different specifications without adjusting the settings. It can be called directly. It has the feature of saving time and effort.
- It is easy to adjust without changing specification parts when changing equipment specification.
- Optional label online printing.
- Optional missing label and missing print detection and exclusion system, which facilitates real-time and accurate product detection and ensures product quality.

Technical Parameters:

Model	BCLT100-10
Labeling speed	0~100 bottle/min
Labeling accuracy	±l mm
Air pressure	0.5～0.8Mpa
Applicable container range	StraightDiameter 20～120mm
Label range	Length 25～300mm
Voltage	110/220V 50/60HZ
Power	0.5KW
Weight	300 kg
Machine size	L:1700mm W:1200mm H:1500mm
