

Spout Pouch Packaging Machine SKZL-3/4/6

Automatic spout pouch pack filling and capping machine is suit for filling and capping liquid products, like juice, hand washing, etc, into stand-up pouch.

Bag Type

Spout bag filling capping machine is suitable for middle spout bag.

Features

1. PLC controller, HMI System;
2. Using variable frequency variable speed system, production speed can be adjusted;
3. Using precision slicer, high precision in rotary positioning;
4. Automatic bag feeding device, save labor cost;
5. Using quantity filling system, with high accuracy;
6. Using plug-in filling device, filling after vacuum, no spitting, foaming phenomenon;
7. Automatic cap arranging and feeding device;
8. Capping device can be adjusted to make sure perfect capping;
9. Automatically output;
10. Machine frame is stainless steel, coated with 304 S/S plate;
11. Organic glass door.

Technical Parameters

Model	SKZL-3	SKZL-4	SKZL-6
Capacity(bag/hour)	2000-3000	2500-4000	3500-6000
Power(kw)	2	2.5	3
Air compressor(m ³ /min)	0.3	0.4	0.6
Weight(kg)	700	900	1100
Dimension(mm)	3000*750*1700	3500*750*1700	4000*750*1700
