

SW-P420 Vertical Packaging Machine

When matching this new version VP42A with different measuring system, it can pack powder, granule, liquid etc. Mainly into pillow bags, gusset bags, also optionally linking bags, punching holes bags for different ways to exhibit better in show shelves. Hope we can help from the beginning to lifetime project.

Features

1. New exterior appearance and combined type of frame are made the machine become more precision on the whole
2. Same appearance of our high speed vffs packaging machines
3. Machine made of stainless steel, all the film going frame is 304 stainless steel
4. Longer film pulling belts, more stable
5. Vertical form fill seal structure is easier to adjust, stable
6. Longer rack of film axis, to avoid damages of film
7. Bag former newly designed, which is the same with high speed machine, suit for flexible packaging and easy to change by just release one screw bar
8. Larger film roller up to diameter 450mm, to save the frequency of change another film
9. Electric box is easy to move, open and maintenance freely
10. Touch screen is easy to move, machine working with lower noise

Specification

Model	SW-P420
Capacity	≤70 Bags/min according to products and film
Bag size	Bag Width 50-200mm Bag Length 50-300mm
Film width	420mm
Bag type	Pillow Bags, Gusset Bags, Linking bags, side ironed bags as "three squareels"
Diameter of Film Roll	≤420mm larger than standard type VP42, so no need to change film roller that often
Film thickness	0.04-0.09mm Or customized
Film material	BOPP/VMCPP, PET/PE, BOPP/CPP, PET/AL/PE etc
Diameter of Film Roll Inner Core	75mm
Total power	2.2KW 220V 50/60HZ
Food Contact	All food contact parts are SUS 304 90% of whole machine are stainless steel
Net Weight	520kg
