

DC-780M Mini (Low Speed) Pillow Packaging Machine

The DC-780M mini (low-speed) form-fill-seal packaging machine can be equipped with electronic scales, liquid metering pumps, servo screws, bowl-type feeding systems, etc., according to the material. It is suitable for fully automatic form-fill-seal packaging of liquids, sauces, powders, granules, and blocky materials.

Wide range of applications, suitable for conventional bags and irregular bags with a bag width of 65-190mm. The equipment has a small footprint, is mini and compact, easy to operate, and is economically priced.

Technical Parameters

Model	DC-780M
Machine Dimensions	1300x760x1500
	Length x Width x Height (unit: mm)
Applicable Bag Width	70-200mm
Applicable Bag Length	70-300mm
Filling Capacity	Maximum 3L
Packaging Speed	8-30 bags/minute
Applicable Bag Type	Pre-made flat bags; Stand-up pouches
Air Pressure	5-6kgf/m ³
Voltage	Single-phase, 220V, 50Hz
Weight	200kg
