

## ***RYN-12/18/24/36 Automatic Whisky Vodka Wine Filling Machine***

This Automatic Whisky Vodka Wine filling machine is developed on the basis of digesting and absorbing advanced technology introducing from abroad and is with international advanced level. It is mainly used for filling non carbonated drink, like white wine, red wine, juice, milk, vinegar, medicine, chemical and so on packed in glass bottle. It adopts the high quality of stainless steel 304 material, meets the requirements of food grade.

### **Features**

1. The tolerance of filling liquid level is below 1.5mm, better than the industry standard.
2. The advanced technology of frequency conversion speed regulation is adopted on the machine, and the largest filling volume will get to 8000-12000 bottles per hour.
3. Bottle height is from 140-390mm, easy to adjust.
4. Tight seal, and it does not fill if there is no bottle or bottle broken. Liquid flows down along the inner wall of the bottle, effectively control of the foam and spill.
5. It is widely used for red wine, fruit wine, yellow wine, sauce-soy, vinegar etc.
6. The spiral bottle arranging device ensures the safety of the bottle-feed-in
7. Automatic Whisky Vodka Wine filling machine is advanced in construction, steadily in performance, safe in operation, easy in maintenance high in production efficiency, and the speed can be regulated infinitively.

## Technical parameter

Model	Head number	Capability	Accuracy	Power	Dimensions
		(b/h)	(mm)	(KW)	(mm)
RYN-12	12	3000	±1.5mm	1.12	1045×985×2200
RYN-18	18	4500	±1.5mm	1.12	1500×1600×2200
RYN-24	24	6000	±1.5mm	1.85	1900×1900×2200
RYN-36	36	10000	±1.5mm	3	2500×2350×2200
