

Automatic Single Head Screw Capping Machine

Characteristic:

- Handsome appearance, smart and fast cover speed, high pass rate;
- The design is novel and original, the mechanical torque control is intelligent, and the operation and adjustment are very convenient;
- The utility model can be used for single machine production and the ideal model for line production;
- Preparation of constant torque capping head, the pressure can be easily adjusted;
- The utility model has the advantages of compact structure, reasonable structure and convenient linkage with other equipment.

Main Parameters:

Machine Power	2.5KW AC220/380V; 50/60HZ
Speed	≤1300B/H
Suitable Bottle/Cap	Customization
Weight	750kg
Air Source	0.6-0.8Mpa
Dimensions (Length*Width*Height)	2000mm*1300mm*2100mm
