

SHL-2520

**ROUND BOTTLE
LABELING MACHINE**

ROUND BOTTLE LABELING MACHINE

Suit for cylindrical shape products in cosmetic, food, pharmaceutical and other light industries, labeling around or half around all ok as client need.

SHL-2520 Automatic Labeling Machine, configure the ultra-large-scale integrated circuit. Microcomputer configuration, can use the touch screen to facilitate the completion of the various data input, and also make the full control of labeling machine when device start up. Can make adjustment of labeling speed depends on the bottle and label sizes.

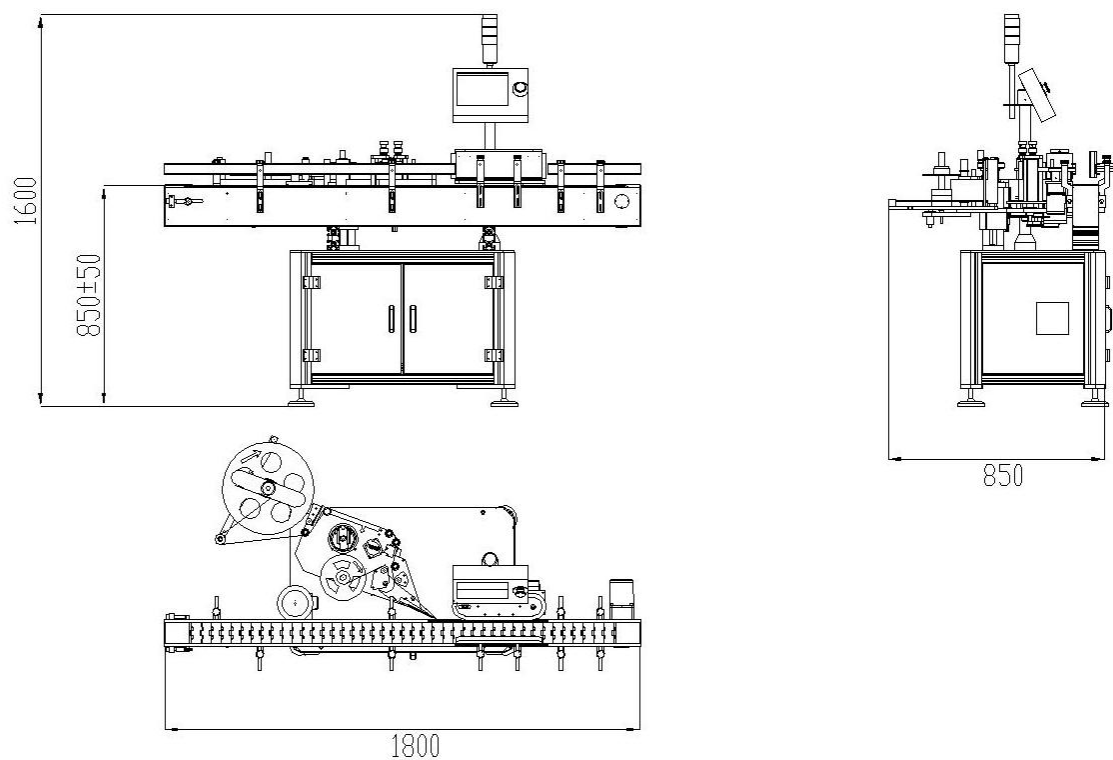

Features:

- The whole machine and spare parts use international standard S304 stainless steel imported alloy material; double anodic oxidation treatment, with high corrosion resistance and never rust, suit for any production environment.
- German import labeling engine is optional, advanced self-adaption labeling control system, reduce and simplify operating and adjusting, improve efficiency; After change products or label, made simply adjustment is ok, don't have much requirement for worker skill.
- Separate bottle device use silica gel material, keep bottles delivery to labeling part with same distance.
- Rolling label device can choose detachable belt or industrial synchronous belt.

Optional:

- Opaque or transparent label material all ok.
- Turntable is optional if machine operation alone, increase efficiency, save labor cost.
- Detect Bar code or with label or not function, rest label alarm function.

Technical Data	SHL-2520
Labeling speed	50 to 200 bottle / min (depending on size of bottle and labels)
Bottle outside diameter	20-100mm
Bottle height	30-260mm
Applies label range	Length 10-300mm, Height 10-140mm
Power supply	220V, 60Hz, Single Phase, 0.55Kw
Dimensions	1800 x 800 x 1500mm
Weight	200Kg
Conveying direction	Left → Right
