

## ***DPP-140F Automatic Blister Packaging Machine***

140F blister Packaging machine adopts PLC screen system, variable frequency, advanced function, easy operation, high quality, so it is the best equipment for the industries such as big and mini pharmacy, and food.

### **Some technical features**

- 1) Automatic universal Alu-PVC feeder.
- 2) Emergency Stop function: when an Emergency Stop is pressed the machine stops safely and can only be restarted by resetting the machine controls.
- 3) Adopt photo cell control.
- 4) PLC control.
- 5) Conform to GMP standard
- 6) With CE certificate

## Technical parameters

punch frequency	20-40 times/min for Alu/pvc
Capacity	2,400 - 4,200 blisters/h (For Alu-PVC)
max. forming area and depth	150*110mm*20mm
Packing Material	PVC/PVDC/PET: 260*0.25 (0.15-0.5)mm PTP Alu-Foil: 260*0.02mm
Travel Range	Standard type: <120mm (special size can be customized)
total power	3 Phase 380V or 220V 50Hz 5.7kw (can be customized)
air compressor	≥0.15m <sup>3</sup> /min (self - prepared)
machine size	2800 *750*1750mm
net weight	800kg
