

SHH-KF Automatic Syrup Oral Liquid Filling Capping Production Line

The syrup filling line is composed of four equipment's: bottle unscramble, bottle washing machine, tunnel sterilization oven, and syrup liquid filling & capping machine.

Each equipment can also working independently; It can automatically complete bottle unscrambling, cleaning, pre-heating, sterilization, drying, cooling, filling, screw (rolling) capping and other processes and is suitable for syrups, tinctures, wines, health products, beverages, sauces and other liquids with different viscosity in the pharmaceutical and food industries packaging line production;

Features:

- The design, materials, manufacturing, assembly, installation etc of the whole syrup filling line are in line with GMP standard
- The syrup filling production line adopts advanced design, reasonable structure, high degree of automation and with stable and reliable operation, high capacity to realizes electric mechanical integration;
- The whole production line has strong versatility and need few operators;
- Imported variable control program, easy to operate
- Filling accuracy, deforming and not drip
- No bottle no filling, no cap no capping
- Easy capping design, low bottle breakage rate
- Frequency stepless speed regulation
- Filling with no pollution, long use life

Technical Parameters:

Product model	SHH-KF2	SHH-KF4	SHH-KF6	SHH-KF8
Suitable size(ml)	2-30(vials)			
Output(pcs/min)	20-60	40-120	60-200	100-250
Filling heads	2	4	6	8
Power supply	380V 50HZ			
Power capacity(KW)	79	79	90	92
Total weight(kg)	8500	8500	8800	9300

Product model	SHH-KF10	SHH-KF12	SHH-KF16	SHH-KF20
Suitable size(ml)	2-30(vials)			
Output(pcs/min)	120-300	150-400	200-500	280-600
Filling heads	10	12	16	20
Power supply	380V 50HZ			
Power capacity(KW)	108	108	115	132
Total weight(kg)	9900	10200	10800	11800
