

## *YN-A Honey Spoon Filling Sealing Machine*

This honey spoon filling sealing machine is specially designed for auto measuring and filling product like water, yogurt, jelly, peanut butter, ketchup, sauce, jam, paste and etc into cups and trays.

It is a full automatic machine include automatic cup drop, filling, sealing, optional production date coding, finish product output. Also, by changing different dosing and measuring device, It is able to fill powder and granular product as well.

### **Main functions:**

1. automatic filling ( no tube no filling)
2. automatic heating
3. automatic sealing and pressing the batch, dates
4. automatic cutting the tail
5. automatic exiting

Our honey spoon filling machine can fill 1200 plastic spoons in 1 hour. Honey, Chocolate, Jam, Marmalade, Milk, Sugar, Salt, Spices, Powder Products can be filled. The difference from the 6-spoon honey machine is its capacity. Our low capacity machine depends on the number of nozzles. The capacity of our machine increases as the number of nozzles increase.

## Technical parameter

Model	Automatic rotary filling and sealing machine-1	Automatic rotary filling and sealing machine-2	Automatic rotary filling and sealing machine-3
	YN-A009	YNA010	YN-A011
Voltage	220V	220V	220V
Power	1.6kw	2kw	2.5KW
Speed	700 cup/hour	1400 cup/hour	1400 cup/hour
Machine size	90*90*155cm	100*100*155cm	110*110*155cm
Machine weight	300kg	300kg	350kg
