

DPB-250C/ANTZ-100 Blister Cartoner Production Line

To decrease the cost and packing products cross pollution, our company develop these two machines in line.

The main part of this line is our DPB series blister packaging machines connecting the ANTZ series cartoning machines through conveyor device and the and controlled by PLC. It can make blister packing, unqualified products rejection, leaflets folded and sealing carton.

This equipment suits to pack capsules, tablets and ampoules into AL/PVC or Paper/PVC blisters then connect with cartoning machine.

Note: we can manufacture the Filling Machine and Cartoning Machine in line according to customers' requirements.

Technical Parameters

Punching Frequency		6~50 cycles/min
Punching sheet		4 blisters/stroke
Adjustable Stroke		40~160mm
Productivity		1000-12000 sheets/hour
Max Forming Area and Depth		245×155×26mm
Total Power		380V 50Hz 5.5Kw
Specifications of Packing Material	Medical PVC	250×0.25 (0.15~0.50mm)
	PTP AL Foil	250×0.02mm
Air-Consumption		≥0.22m ³ /min
Pressure		0.5~0.6MPa
Overall Dimension		2900×7200×1550mm
Weight		1600kg
