

HD-100 Capsule Counting Machine

Application: widely used for counting and filling of capsules, pill, tablets.

Features:

1. The machine adopts electromagnet for vibration, which is stable and reliable.
2. Unique design, and it is easy for the operator to check the counting accuracy.
3. Small in size, light in weight, and is easy to operate. It is applicable to pharmaceutical, hospital, food and other industries.
4. It is suitable for pharmaceutical, hospitals, food industry, tablets, granule drugs or food counting, bottle and bagging. The counting mold can be changed based on different materials.
5. Medicine contact parts adopt stainless steel as raw material to ensure the packaging goods conform to GMP requirements.

Technical Specification:

Mode No:	HD-100
Diameter of counting plate	400 mm
Holes in the counting plate	Customized, 5-100 if required
Size of tablets/capsules	As required
Dimension	60*50*70cm
Voltage	110-220V 50HZ-60HZ
Net Weight	48kg
Power	150W
Production Capacity	12-26 bottles (bags)/min
