

HXP type plastic bottle gas washing machine

Purpose and brief:

This machine for plastic bottle liquid filling production line in the bottle cleaning equipment, mainly used for plastic bottle cleaning dust. The bottle into the gas tank washing after turning 180 degrees, jet needle is inserted into the bottle to shower, after the completion of over 180 degree gas washing box. Gas washing box waste gas is sucked out outdoor for centrifugal fan. As to static, with the negative ion generator can be.

Main technique parameters

Production capacity: 80-120 bottles / min
Suitable bottle: 50ml-200ml plastic bottle-shaped garden
Clean air consumption: 0.3m³ / min
Pressure: 0.2 ~ 0.3MPa
Power supply: 380V 50Hz
Power: 1Kw
Dimensions: 2200×800×1400
