

Table type single hole filling machine BCZG30-01

Small volume and easy operation. (Normal temperature, heating) Two filling modes feature different viscosity products. Special precision abrasive piston pump with no leakage.

Features:

- The design of quantitative filling adjustable piston cylinder.
- Material barrel with double layer design, oil-proof heating, temperature can be set.
- Material barrel stirring, speed can be adjusted.
- The barrel can be used for compressed air filling of special sticky materials. Vacuum and negative pressure debubbling function can also be customized.

Technical Parameters:

Model	BCZG30-01
Bucket capacity	15L
Compressed air demand	0.5~0.8MPa
Voltage	110/220V 50/60HZ
Power	1.5KW
Weight	50KG
Overall dimensions	L:700mm W:450mm H:600mm
