

DC-238 Fully Automatic Horizontal Form-Fill-Seal Packaging Machine

The DC-238 is a fully automatic horizontal roll film bag making, filling, and sealing integrated packaging machine.

It can be used to produce products with three-side seals, four-side seals, stand-up pouches, zipper bags, etc.; suitable for many fields such as food, daily chemicals, and medicine; modular design, customers can choose different coding modules, forming modules, sealing modules, easy-tear notch punching modules, and European-style notch punching modules according to their needs.

Technical Parameters

Model	DC-238
Machine Dimensions	6760x1450x1945
	Length x Width x Height (unit: mm)
Bag Making Width	75-200mm
Bag Making Length	140x280mm
Maximum Bottom Diameter	100mm
Roll Film Diameter	550mm
Roll Film Width	660mm
Roll Film Inner Diameter	74mm
Bag Shape	Flat bottom bag, stand-up pouch, zipper bag
Packaging Speed	35-45 bags/minute
Power	9.5KW/H
Air Consumption	0.5-0.7m ³ /minute
