

HM-600A Pillow Packing Machine

The machine is widely used in food. Pharmaceutical. Hardware. Daily, printing and other industries pillow packaging products.

Product description:

1. Machine master using Siemens (PLC) programmable controller, the whole operation is accurate and stable.
2. Man-machine interface full Chinese display, set the storage, convenient and fast.
3. The main motor configuration high-quality AC inverter, to achieve variable speed.
4. High-precision photoelectric detection tracking, testing supplies two-way automatic compensation, accurate and reliable.
5. Bag length adjustment using tooth chain type CVT, durable and stable.
6. Conveyor chain non-stop adjustment device, convenient and sensitive.
7. Adjustable end seal structure, so that the seal is more perfect, and remove the phenomenon of cutting packets.
8. Can be equipped with nitrogen filling device, install the thermal printer, print position can be arbitrarily selected.
9. Shell can be made according to customer demand for all stainless steel or body spray.

Model	HM-600
Production speed	20-80包/分钟
Packing film thickness	0.03-0.06
Package size	L:100-900mm W:50-300mm H:30-100mm
Power supply requirements	220V/50HZ
Total power	2.4KW
Dimensions	4800mm×900mm×1500mm
Total weight of equipment	900kg
