

Linear Weigher CN-X2-2-1

This machine is mainly suitable for weighing all kinds of small granular items in the assembly line.

Introduction

The machine collects the weight of the material in the weighing hopper in real time, and after analysis and processing, changes the working amplitude of the wire vibrating machine, thereby controlling the feeding speed of the wire vibrating plate, so that the weight of the material in the weighing hopper approaches the target weight, and achieves the target weight. The purpose of material weighing and subcontracting.

Specifications

Model	CN-X2-2-1
Max Outputange	32ppm
Accuracy	1-3% depending on product size /machine speed.
Single Weighing Range	50-3000g
Hopper Volume	4.5L
Parameters Press No.	20
Max Mixing Products	2
Power	800W
Voltage	220V/50/60HZ/4A
Packing Dimension(mm)	685(L)*814(W)*971(H)
Weight	130KG
