

OZM Oral Dissolving Film Making Machine

Oral Dissolving Film Making Machine produces thin films from liquid materials.

It is designed to make oral films that dissolve quickly, as well as strips for breath fresheners and other uses.

The machine has broad applications in the pharmaceutical and food industries.

Technical parameters

Project	Parameter
Max Production Width	360mm
Roll Width	400mm
Speed	0.1-1.5m/min (Depends on products formula and process)
Unwinding Diameter	$\leq \Phi 350\text{mm}$
Winding Diameter	$\leq \Phi 350\text{mm}$
Method Of Heat & Dry	Heating by external stainless-steel heater, hot air circulation in centrifugal fan
Temperature Control	$30-80^{\circ}\text{C} \pm 2^{\circ}\text{C}$
Edge Of Reeling	$\pm 3.0\text{mm}$
Power Supply	16Kw
Overall Dimension	2980*1540*1900mm
