

R45 Small Automatic Tube Filling Machine

The machine is suitable for both laminated tube and plastic tube. And it is an ideal machine for filling and sealing both soft tube and composite tube.

Various types of hole punch can also be made or sealed by the machine.

The applied range: Daily chemical industry, medicine, food, chemical products, cosmetics. Specifically, including toothpaste, shoe oil, peanut paste, meat paste, adhesive, facial foam, hand cream and BB cream etc.

Whether to use dust covers which is good for medicine, food and other special industries in your products is free for choosing.

The Working Process of Our R45 Soft Tube Filling & Sealing Machine:

1. Automatically loading and filling
2. Internal and external heating
3. Sealing
4. Printing the code
5. Dividing the printed tube
6. Unloading the finished products

Five Competitive Edges of Our R45 Soft Tube Filling & Sealing Machine:

1. Touching screen and PLC controlling system make the operation convenient and easy to handle.
2. Having stable functioning performance and easy maintenance way, the machine is also possessing the quality assurance for one year and life-long free guarantee.

3. The whole automatic working process ensure the high accuracy and speed.
4. It is the Stainless Steel #316, which meet the requirements of GMP that make all contact parts in Our R45 Soft Tube Filling & Sealing machine.
5. The machine is available for different specifications of tubes. High measuring accuracy and reliable stability make the productions beautiful and firm.

Depending on the your tube materials, we will choose the best type of machine for your industry.

Technical Parameters

Voltage	110V/220V/380V
Power	1.1kw
Heating Power	400w*2
Air Pressure	0.6-0.8Mpa
Production Capacity	25-45 tubes/min
Filling Volume	1-300ml
Filling Error	± 0.5g
Material	SS304/316
Dimensions	1500*700*1800mm
Weight	475KG
