

LTPK W-1600 Automatic Continuous Sealing Machine with Inkjet Printing

W-1600 Plastic polythene bag pouch variable data inkjet printing sealing machine is widely used in various industries. It is suitable for sealing various packaging bags. The intelligent control system panel, the sealing machine and the inkjet printer are combined into one. The packaging sealing speed is fast, and the intelligent inkjet coding is more convenient.

Application:

This machine is suitable for sealing various heat sealed packaging bags such as aluminum foil bags, plastic bags, composite bags, kraft paper bags, fresh-keeping bags, tea bags, etc.

Technical parameters:

Model	W-1600
Voltage	220V 50Hz
Power	500W
Sealing speed	0-12 m/min
Sealing thickness	0.02-0.80 mm
Sealing width	6-12mm
Sealing length	0-infinity
Transporting loads	≤3kg
Printing method	Inkjet printing
Temperature range	0-300 °C
Size	930*370*390mm
Weight	25kg
