

## *Milk Filling Machine*

The Milk Filling Machine is a cutting-edge solution for 200-ml glass and PP bottles with up to 120 bottles per minute output speed. Harikrushna Machines takes pride in presenting state-of-the-art milk-filling solutions designed to meet the evolving needs of the dairy industry. Our filling machine ensures precision, efficiency, and reliability in every operation. HMPL's cutting-edge technology streamlines the milk packaging process and enhances production capabilities.

### **Features**

- **Precision Filling Technology:** Our milk bottling machine ensures accurate and consistent filling of milk bottles with minimal product waste.
- **User-Friendly Interface:** Our milk bottle fillers feature an intuitive interface for easy operation and control. The user-friendly design enables quick setup and adjustment for a smooth production flow.
- **Versatility in Bottle Sizes:** Our machines fill various bottle sizes efficiently. Whether you are filling small or large milk bottles, our equipment adapts to your specific needs.
- **Robust Construction:** High-quality materials and components are used for reliable performance with minimal downtime and high-quality production.
- **Tailored Solutions:** Harikrushna Machines understands that every dairy operation is unique. Therefore, we offer tailored solutions per requirement, ensuring a perfect fit for your production line.
- **Compliance with Industry Standards:** Our machines adhere to the highest industry standards and regulations, ensuring that your milk packaging process meets all necessary quality and safety requirements.

**Technical Data**

<b>Product MOC</b>	GLASS/PET/HDPE Bottles/Jars
<b>Filling Material</b>	Raw Milk, Flavoured Milk, Butter Milk, Lassi
<b>Liquid Filling Volume</b>	100 ml to 1000 ml
<b>Output Speed</b>	Up to 300 Bottles / Minute (Speed depends upon fill volume, viscosity of liquid Product neck & shape)
