

DS-series Linear Hot Melt Adhesive Labeling Machine

Automatic speed control according to the supervision on the conveyer Automatic film self-aligning system Automatic label leading and label length control system Containers are transferred to the space between vacuum drum and friction board by in-feed screw and star wheel. Labels are transferred to vacuum drum after cut by cutting drum, and labeled to the containers with glue on the leading and edge applied by glue roller. The end edge of label is brushed smoothly on to containers. Containers are transferred to output conveyer by another star wheel.

主要技术参数 Main Technical parameters

型号	Model	DS-400 11
贴标速度	Labeling Speed	400瓶/分
贴标精度	Labeling Precision	±0.5mm
最大标高	Max.Label Height	Max500mm
整机功率	Total Power	约11kw
整机重量	Net Weight	约2500kg
机器尺寸	Machine Dimension	4000*1570*2040mm
电源要求	Power Supply	380V ± 10% 50Hz (特殊要求, 另行说明)
气源要求	Air Requirement	0.6Mpa
