

Double Track Filling Capping Machine HHGG-10

It's applicable to the packaging of plastic bottles and glass bottles of 20-500ml. It is widely used in large volume liquid packaging such as large infusion and syrup. Increase the filling pump and improve the output.

Technical Parameters:

Applicable range	30-500ml(Pump change)
Production capacity	80-160bottles/min(100ml)
Filling head	8, 10, 12, 16 Optional
Filling pump	Stainless steel or ceramic pump, peristaltic pump optional
Plug adding qualified rate	≥99.5%
Total power	2.5kw
Electric source	220V 50Hz
Filling quantity error	±1.0%
Air pressure and usage	0.35-0.5MPa 5m ³ /h
Weight	About 1000kg
Overall size	3200 x 1200 x 1700mm
