

RS-600W High Speed Automatic Shrink Packaging Machine

This machine is in produce pillow packaging machinery, in basis improvement, innovation equipment! Solve the domestic heat shrinkable Film packaging speed slow, expend artificially conundrum, mechanical covering film speed, packaging and beautiful, also can container Bag, automatic printing production batch number! is a multi-usage function heat shrinkable packing machine, apply to boxes, bags, There are rules a single object, the block material heat shrinkable packaging, widely used in the food, food, pharmacy chemical industry, etc. (such as: boxed mosquito-repellent incense, cosmetics, bag, gift boxes, photo album, disposable tableware, towel, hardware Japan, and all sorts of automobile and motorcycle parts of heat shrinkable packaging)

Features

Using original single servo or double servo motor control, compared with other domestic and foreign similar inverter motor or inverter control products, more intelligent, higher packaging precision, wider adjustable range, more accurate control, lower scrap rate and better stability. Due to the full open box structure, the transmission structure is clear at a glance, and the maintenance is more convenient;

Technical Parameters

Max film width	590mm
Max packaging capacity	50-120 times/minute (According to its material to fix)
Suitable film thickness	0.03-0.06mm
Length of bags	65-350mm
Packaging with	25-280mm
Packaging high	20-100mm
Total power	7.8Kw 220V/380V 50Hz
Overall dimensions	7000x1200x1500mm
Weight	1000kg
