

DZ645/2E Multi-function Vacuum Packaging Machine

Features:

- ◆ The surface of the stainless steel casing is treated with a special process that is uniform and luxurious. At the same time, it has the advantages of dirt resistance and scratch resistance.
- ◆ Sealing temperature and sealing time can be adjusted in a wide range, suitable for packaging of various materials.
- ◆ The heating wire pad at the sealing part is easy to replace.
- ◆ Multi-functional vacuum chamber: ① special deepening vacuum chamber for tea, pickles, etc.; ② plus a flat plate, like ordinary vacuum chamber, can save packaging time.
- ◆ There is an emergency button on the control panel. If the packaging process is abnormal, press the emergency button to interrupt the packaging process and use it safely.
- ◆ The use of high-quality vacuum pump, vacuum effect is good; using well-known brand electrical components, stable performance and long service life.
- ◆ It can be customized according to customer requirements. It's can use with rice block mold, after vacuuming, the rice or tea will be block shape.

Technical Parameters

| Model | DZ645/2E |
|-------------------|---------------------|
| Power Supply | 220-240V/50-60HZ |
| Sealing Power | 1.5KW |
| Vacuum pump power | 0.9KW |
| Sealing size | 645x10mm |
| Pump capacity | 20m ³ /h |
| Machine size | 760x460x820mm |
| Weight | 90KGS |
