

DGS-50K Rice Packing Machine

This 50kg rice packing machine is an intelligent packaging scale developed by our company for granular materials and irregular materials. It adopts pneumatic gate feeding or belt feeding method, and advanced stepless frequency conversion technology.

50kg rice packing machine is designed according to the national standard GMP, which can finish a sequence of work; weighing, filling, sealing, sewing, deliver and other processes. And widely used for food, medicine, building materials, plastic, chemical and other industries packing powder materials. Such as milk powder, rice noodles, cereals, coffee, sugar, coffee, glutamate, solid beverage, glucose, solid, pharmaceutical, pesticide, granular additive. The main parts of machine is made by 304 stainless steel. With the famous brand of the machine body, motor, cylinder, electrical accessories, pneumatic components, pneumatic sealing machine, sewing machine. And the customer could choose the brand by himself.

Features

1. Gravity feeding mechanism, spiral feeding mechanism, belt feeding mechanism are optional, suitable for quantitative weighing and packaging of different materials
2. Three-level feeding speed, fast speed and high precision
3. Install 3pcs load cells, with high accuracy and strong stability
4. PLC system and touch screen interface make the operation easier
5. Proximity switch induction bag clamping, automatic detection, no hand clamping, safer operation
6. Fully automatic sewing bag, fast speed, beautiful stitching

Technical Parameters

Model	DGS-50K 50kg rice packing machine
Volt	380V 3PH 1.1kw
Packing range	5-50kg
Packing error	±0.5%
Hopper	200L
Packing speed	4-8 bag/min
Auxiliary equipment	Air compressor
Air pressure	0.6Mpa
Machine size	80*100*260cm
Weight	600kg
Material	304SUS
Control way	PLC control, touched penal
