

Pouch Filling And Sealing Machine Coffee Beans

Pouch filling and sealing machine coffee beans is a professional automated production equipment.

Features

1. Pouch filling and sealing machine coffee beans is made of high-quality stainless steel, with a reasonable internal structure and beautiful appearance.
2. The equipment adopts intelligent control technology to achieve automated operation and improve production efficiency.
3. The device has an automatic detection system to ensure product production quality.
4. The drip coffee filling machine has the function of liquid filling, and the filling volume is accurate and consistent without waste.
5. Pouch filling and sealing machine coffee beans is easy to clean and maintain.

Product Description

1. Pouch filling and sealing machine coffee beans is a high-performance production equipment designed based on the current market demand for coffee content and ingredients. It uses intelligent control technology to achieve automated operation, accurate and consistent filling volume, and improves production efficiency and product quality.
2. The equipment has the advantages of automatic detection system, easy cleaning and maintenance. It is suitable for coffee manufacturers to meet people's higher demand for coffee and strict requirements for filling accuracy.
3. The drip coffee filling machine adopts a fully automatic control system, which can simultaneously complete the processes of powder metering, bag filling, bag sealing, etc.
4. Pouch filling and sealing machine coffee beans can meet the needs of different types of bag filling processes and better adapt to market needs.

Products Parameters

Packaging Speed	30-50 bags/min(Depends on the material)
Inner Size	(W)180mm*(L)74mm
Outer Size	(W)200mm*(L)120mm
Measuring Range	5-12G/BAG(Special specifications can be ordered separately)
Power	1.5KW/220V/50Hz
Weight	650kg
Dimension(L*W*H)	1200mm*740mm*2370mm
