

MD-420K Electronic Scale Granule Packaging Machine

The MD-420K machine is ideal for packaging bulk and block materials. This type of automatic granule packing machine efficiently handles a variety of products, including puffed foods, crispy rice balls, pistachios, candies, cakes, rice, frozen meatballs, dumplings, glutinous rice balls, pet food, small hardware, and medicinal materials.

Features

1. The automated granule filling machine is more effective and straightforward due to its integrated packing process and automated operation.
2. Electrical accessories of the MD-420K automatic granule packing machine are all from well-known brands at home and abroad, with long life and high stability.
3. The automatic granule packing machine's mechanical parts are of top quality, with low loss and durability.
4. The film-releasing structure of the automatic granule-filling machine is straightforward, with an automatic deviation correction feature.
5. With cutting-edge software, the granular filling machine ensures easy operation, excellent customization, and enhanced efficiency powered by superior hardware.

Parameters

Model	MD-420K		
Measurement Method			
Production Efficiency	20-60 bags/min		
Bag Size	L: 50-300mm W: 100-200mm (customizable)		
Packing Accuracy			
Power Supply	2.2kW/220V	Air Consumption/Pressure	6-8bar/0.3mm ³ /min
