

LTPK LT-DAFC01+LT150 Desktop Automatic Penicillin Bottle Filling Capping and Labeling Machine

This filling capping machine is designed for the vial, this is a custom made machine, we can custom it for a variety of small plastic or glass bottles. It can sort bottles, fill liquid into bottle, tighten bottle caps. It is also equipped with cap vibratory bowl sorter which can feed bottle caps automatically. And equipped with a desktop round bottle labeling machine to form a production line, saving production labor.

Application:

It is used for filling blood, biological reagent, oral liquid, injection, advanced cosmetics, essence, bactericide and other liquids, and is widely used in food, chemical, cosmetics and other industries

Technical parameters:

Model	LT-DAFC01+LT150
Voltage	220/110V
Power	2000W
Filling range	customized
Bottle size	customized
Cap size	customized
Filling pump type	magnetic pump
Working speed	20-30 bottles/min
Filling nozzle	1 (can be customized)
Capping nozzle	1 (can be customized)
Air pressure	0.4-0.6Mpa
Way of stoppers/caps feeding	Vibration plate
Machine weight	About 250kg
Machine size	1260*720*880mm
