

ZHG-50YL Pigment Filling and Capping Machine

This machine has the functions such as automatically screw type bottle feeding, bottle detecting (no bottle no filling, no bottle no cap feeding), filling, cap feeding and capping automatically.

Introduction: Turn plate is intermittent movement and driven by divider with accurately positioning. Cylinder drive the piston and two filling heads fill at the same time. When the machines fill cream into the jar, meanwhile the rod spin the jar to prevent foam. According to the different jar size, it is easy to replace the turn plate. Filling parts can be dismantled and meet GMP standard. The machine is with no jar any filling function and controlled by PLC.

Technical Parameters

- Applicable material: medium and high viscous cream
- Filling range: 10g-125g
- Production capacity: 40-50 jars/min.
- Hopper capacity: 80L(adjustable)
- Power Supply: 220V 50Hz
- Power: 4KW
- Air consumption: > 4-5KG F/CM 100L/MIN
- Dimension: 2400*1250*1800
