

SPOP-90B Cellophane Overwrapping Machine

Short Description:

1. PLC control makes the machine easy to be operated.
2. Human-machine interface is realized in terms of multifunctional digital-display frequency-conversion stepless speed regulation.
3. All surface coated by stainless steel #304, rust and humidity-resistant, extend the running time for the machine.
4. Tear tape system, for easy to tear out the out film when open the box.
5. The mould is adjustable, save changeover time when wrapping different sizes of boxes.
6. Italy IMA brand original technology, stable running, high quality.

Mechanical Data

SP Series	SPOP-90B
Packing Length (mm)	80-340
Packing Width (mm)	70-150
Packing Height (mm)	30-130
Packing Speed (midbag/min)	20-25
Diameter/ Thickness of Inner Hole (mm)	Φ75 /0.021-0.028
Gas Consumption (L/min)	20-30
Power (TN-S)	50HZ/AC220V
General Noise (A)	<65dB
Power Consumption (kw)	1.5
Gross Power (kw)	2.25
Weight (kg)	800
Dimensions (L*W*H) (mm)	1300*1250*1050
Packing Material	BOPP or PVC, and so on
