

Pharmaceutical Powder Mixer Blending Machine VI-1000

V shape Mixing Machine commonly used in pharmaceutical, nutraceutical, chemical, food and related industries to mix dried powder and granules with good followability. The VI Mixer Machine is equipped with a forced stirring paddle to enhance the mixing effect and can be used to mix easily caked materials. This Blending Machine can work with vacuum conveyor to achieve automatic feeding and prevent dust.

Technical Parameters:

- Model: VI-1000
- Application: Medicine Processing, Chemicals Processing, Food Processing, Powder
- Barrel Volume(L): 1000
- Max Loading Volume(L): 600
- Overall size(L×W×H)(mm): 2800*1350*2700
- Weight(kg): 1100
