

Automatic Screw Sealing Capping Machine LM-CAP

The whole automatic capping machine adopts elaborate DIY design.

By eliminating unnecessary complex and heavy machinery. It adopts suit type assembly.

The maintenance and servicing can be completed without professional. When it is necessary to replace the product just make some simple adjustments,

It can be immediately put online for production.

Feature:

1. Adopt flexible combination design, suitable for different sizes of bottles and caps.
2. For different sizes of caps, it is not necessary to change the spare parts, just simple adjustment is ok.
3. With cap locator, the position of the caps and pump will be the same.
4. Easy operation and adjustment, low cost for maintenance.
5. Designed according to GMP requirement.

Technical parameter:

- Production speed: 5000-6000bottles/hour
- Applicable bottle height: 80-320mm (can be customized)
- Available cap diameter: 20-55mm (can be customized)
- Power supply: 220v/50/60HZ (can be customized)
- Power: <1KW
- Dimension: 2400x1200x1600mm
- Weight: 550KG
